

# Tourly – Travel Agency Website Documentation

CEO – Samiksha Mhaske

Roll No. 234

Date – 24/9/24

## 1. Project Objective and Scope:

**Objective:** The Tourly website is designed to streamline the process of booking travel packages and exploring popular tourist destinations. It provides a user-friendly interface where customers can search for destinations, book travel packages, and inquire about available options. It aims to simplify the process for individuals looking to plan vacations, holidays, and other travel experiences.

### Scope:

Showcase popular destinations and travel packages.

Provide users with an easy-to-use booking and inquiry system.

Display a gallery of photos from previous trips.

Allow users to subscribe to newsletters for travel updates.

Make contact information and support easily accessible.

## 2. Technologies Used:

HTML5: Structuring the webpage and content.

CSS3: Styling and layout management for a responsive design across devices.

JavaScript: Adding interactivity for navigation, form validation, and other dynamic elements.

Icons: Icon set used throughout the website for navigation and social media icons.

Google Fonts: Custom fonts for a professional and modern look.

## 3. Website Pages and Features:

### 3.1 Home Page:

The homepage includes a hero section with a prominent call-to-action ("Journey to explore world") and buttons for learning more about the travel packages and booking directly.

The navigation bar links to various sections like Destinations, Packages, Gallery, and Contact Us.

A search form allows users to input details like destination, number of people (Pax), and check-in/check-out dates.

### 3.2 About Us Page:

Describes the background and mission of Tourly as a travel agency. It emphasizes the ease of booking and provides insight into why users should trust Tourly for their travel needs.

### 3.3 Destination Page:

Displays popular travel destinations (e.g., San Miguel in Italy, Burj Khalifa in Dubai, Kyoto Temple in Japan).

Each destination is displayed in a card format with images, ratings, and a brief description.

### 3.4 Packages Page:

Shows different travel packages with details such as duration (e.g., 7D/6N), number of people (pax), and price.

Each package includes an image, reviews, and a booking button.

Example packages: "Experience The Great Holiday On Beach" and "Santorini Island's Weekend Vacation."

### 3.5 Gallery Page:

A photo gallery section showcasing images from past travelers' experiences.

A grid format is used to display high-quality travel images.

### 3.6 Contact Us Page:

Provides contact information including a phone number, email, and address.

A call-to-action section encourages users to get in touch with Tourly for any inquiries.

### 3.7 Newsletter Subscription:

A form at the footer allows users to subscribe to Tourly's newsletter to receive updates and offers via email.

## 4. Features and Functionalities:

**Responsive Design:** The website is fully responsive and adjusts to different screen sizes (e.g., mobile, tablet, desktop).

**Search and Inquiry Forms:** Users can easily search for destinations and inquire about packages by providing necessary information (e.g., destination, dates, number of people).

**Popular Destinations and Packages:** The website displays popular tourist destinations and available packages with options to book directly.

**Dynamic Ratings:** Destinations and packages come with star ratings displayed using Ionicons.

**Photo Gallery:** A grid-based photo gallery gives a visual representation of past travelers' experiences.

Social Media Integration: Links to social media platforms (Facebook, Twitter, YouTube) using icon buttons.

5. Testing and Validation Process:

Test Case	Description	Expected Result	Status
Home Page Load	Verify that the home page loads without issues.	Home page should load within 3 seconds.	Pass
Navigation Links	Test all navigation links (Home, About Us, etc.).	All links should navigate correctly.	Pass
Destination Search Form	Test form with valid and invalid inputs.	Form validation should work as expected.	Pass
Package Booking Button	Verify that the "Book Now" button works.	Clicking the button should lead to booking confirmation.	Pass
Contact Form Validation	Submit the contact form with valid and invalid data.	Error messages should appear for missing/invalid data.	Pass
Image Loading	Check if all images load correctly.	Images should load without errors.	Pass
Newsletter Subscription	Test the subscription form with a valid email.	The form should successfully accept the email.	Pass

6. Security and Usability:

Form Validation:

All forms (e.g., inquiry, contact, subscription) include validation to ensure required fields are filled.

Forms give error messages for invalid data input.

Secure Booking Process:

Input data for the booking process is secured and validated.

Navigation Usability:

Smooth and clear navigation across all pages. Responsive design ensures easy access to content on all device types.
